Priori® Forte Skincare System

A **comprehensive** Advanced AHA skincare system based on partially neutralised Lactic Acid

Priori Forte's Lactic Acid compound formulas provide advanced pharmaceutical grade anti-ageing results combined with the highest safety of use for patients:

- Advanced exfoliation with higher concentrations of free acid, for optimal skin renewal that promotes the visible reduction of fine lines and wrinkles and smoother, more radiant skin.
- Stimulation of the natural production of collagen and elastin for firmer skin.
- Superior skin moisturization from the inside out as Lactic Acid stimulates the natural production of Hyaluronic Acid (skin's natural moisturiser), 70 to 95% better than Glycolic Acid, for well hydrated, supple, healthier, younger-looking skin.
- A time released reservoir of Lactic Acid for continuous action throughout the day.
- A safer result because Lactic Acid is natural to the human body and the pH of PRIORI's Lactic
- Compound is close to that of normal skin.

Skincare Products and Treatments

Skin Peels - The Priori Forte Professional Skin Renewal system is designed to accelerate and maximise the results obtained with Priori Forte skincare products. The treatment regime consists of two Priori Forte Lactic Acid Chemical Peels with 50% and 75% free acid, designed to treat all skin types and are particularly indicated for premature ageing, rejuvenation and adult acne.

Facial Cleanser 20 - Exfoliates and cleanses all skin types.

Facial Lotion 20 - Visibly diminishes the appearance of fine lines and wrinkles, improves skin tone and softness, resulting in younger healthier looking skin.

Facial Cream 20 - Visibly diminishes the appearance of fine lines and wrinkles, improves skin tone and softness, resulting in younger healthier looking skin.

Hand and Body Lotion 20 - For intense moisturisation of dry and sun damaged areas. Ideal for thicker skin areas such as hands, elbows, knees and feet.

Skin Perfection Lotion 20 - Designed to be a light lotion formulation to be used on problem prone skin. Contains a higher level of Lactic Compound in an oil free, light weight vehicle.

Priori® Pre-Peel Instructions

- Avoid clay masks, scrubs or exfoliating agents for at least 48hrs prior to peel procedure.
- No self-tanning agents for at least 48hrs prior to peel procedure.
- No Retin A or Vitamin A products to be used for at least 48hrs prior to peel procedure.
- No peel will be administered if you have cold sores or fever blisters on the area to be treated. If in doubt please call your practitioner for advice.
- No waxing or plucking in the area to be treated for at least 48hrs prior to peel procedure.
- No peel will be administered if the area to be treated is sunburnt or if you have been on a sun bed within the past 48 hours (or more if the area is still sensitised.) If in doubt please refer to your practitioner for advice.
- Other facial procedures such as (but not limited to) laser treatments, other chemical peels, Botox®, Dermal fillers (and other injectable procedures), surgery or Microdermabrasion
- Adhere to all the advice above prior to each peel procedure.
- Apply the appropriate Priori Forte as advised by your practitioner, to the area to be treated for a minimum of two or three weeks prior to your first peel procedure. If any irritation occurs please refer to your practitioner for advice before your first treatment.
- Use of the complete Priori Forte homecare regime prior to your first procedure will enhance optimal results.

Priori® Post-Peel Instructions

- Normally, make up can be applied after your peel procedure but keep to a minimum and avoid any highly perfumed cosmetic products
- You should not exercise for 24 hours after each procedure
- You should avoid direct sun or sun bed exposure for at least 48hrs
- SPF 30 should be applied daily as regular protection
- You should avoid applying any other skin care products to your skin on the day of your peel
- Do not use Retin A or Vitamin A for at least 48hrs after your peel
- No facial waxing should be performed for at least 48hours after your peel
- No heat treatments (such as but not limited to, saunas, steam rooms, facial steaming, cooking in hot kitchens etc.) for at least 48 hours after your peel
- Avoid chlorinated water for 48 hours after your peel

- Temporary skin dehydration ranging from mild dryness to slight crusting is not uncommon following the Piori Forte peel. In addition some discoloration may occur
- Wait 24 hours following your peel before resuming your basic Piori Forte homecare products
- Wait 48 hours following your peel before resuming your Piori Forte corrector products.
